

SUMMARY

Results-driven professional in analytics and data science product/project management, adept at leading cross-functional teams (ML, engineering, design) with a blend of strategic oversight and hands-on expertise. Skilled in driving impactful contributions, delivering innovative solutions, and fostering collaboration. Actively seeking senior Product, Project, or Program Management roles in analytics, data science, and machine learning across industries, following a personal caregiving commitment.

SKILLS & TOOLS

- **Focus:** Analytics/Machine learning product and agile project management
- **Tools:** Tableau, R, SQL, Google Data Studio, Figma, PowerBI, Excel
- **Platform:** JIRA, Confluence, GCP, AWS
- **Design/Product:** Prototyping, Wireframing, User Research, Roadmap Planning, Feature Prioritization
- **Industry:** Insurance, FMCG, Semiconductor, Advertising

Caregiving sabbatical

Full time caregiver for my terminally ill mother; following her passing, getting back to my professional career.

**AI-Driven Auto Insurance Startup (Jan, 2023 - Aug, 2024)**

**Freelance Product Manager & ML Specialist**

- Defined the product roadmap and prioritized features using market insights and customer feedback, ensuring alignment with business goals.
- Led MVP design with image processing models, cutting claims processing time by 30% through automated damage assessments.
- Initiated churn prediction modeling, uncovering key customer retention patterns. Established infrastructure projected to reduce churn by 15% and increase retention by 10% upon deployment.
- Led the early-stage development of an ML-driven fraud detection model, establishing a framework to reduce fraudulent claims by 40% and automate manual review efforts. Integrated fraud detection into the startup's claims workflow.

**[MiQ Digital](#)**

**(Apr, 2022 - Nov, 2022)**

**Engagement Manager - Data & Analytics**

Engagement Lead at MiQ Digital: Delivered data-driven advertising solutions to global brands, directed analytics with predictive and prescriptive use cases, and led use case identification, stakeholder education, and team evaluations to align with organizational goals. Initiated a transformative Quality Check program, cutting turnaround time by 50%, reducing data errors by 70%, and significantly enhancing insights quality.

**[Quantiphi Inc](#)**

**(Mar, 2019 - Jan, 2022)**

**Associate Engagement Manager**

Served as Engagement Manager at Quantiphi, an AI-first digital engineering company. Oversaw project and product delivery utilizing agile methodologies, ensuring efficient tracking of costs, resource & stakeholder management. Led technical and business initiatives, driving alignment across teams. Spearheaded pre-sales pitches and provided leadership in the development of AI-powered products, fostering innovation and client engagement.

## EXPERIENCE

- Led the delivery of a critical MLOps pipeline on Google Vertex AI for a major semiconductor client, enabling real-time image-based defect detection. Orchestrated data pipelines and deep learning model lifecycles, achieving 1-second prediction latency, operational cost savings, and driving \$2.5M in client account expansion.
- Engineered an advanced automated pipeline with AWS Textract and SageMaker for an insurance provider, reducing claims adjudication time from 15-24 hours to ~15 minutes. Orchestrated end-to-end customer journey analysis, wireframes, and provided team leadership.
- Designed customer-360 insurance product, utilizing machine learning to deliver personalized experiences, cross-sell opportunities, CLTV calculation for showcasing capability. Converted sales leads averaging over \$200K in business value.
- Led data science product for a leading US insurance provider's pricing team, leveraging AWS services like S3, EMR, and EC2. Reduced SLAs for infrastructure setup, security, and model building from weeks to days, optimizing infrastructure, security, data processing, and predictive modeling.
- Led end-to-end design and execution of AWS-powered data lake setup for a US insurance client, encompassing migration, data schema development, robust pipelines, and integration with analytics tools.

### WNS Global Services (Nov, 2015 - Mar, 2019)

### Assistant Manager Research & Analytics

As an Assistant Manager at WNS, helped analyze and solve business problems for a major FMCG client and provide predictive and prescriptive insights for their retail business partners

- Conducted comprehensive sales driver analysis for major US FMCG brand, resulting in strengthened partnership and expanded scope of work (\$100K+)
- Optimized shelf space (SKU optimisation) for major US FMCG brands, across retailers, resulting in cost savings (\$5mil+) and increase in prospective sales
- Conducted social media listening and sentiment analysis to impact marketing and brand strategies, leading to a 15% increase in engagement metrics and a 10% shift in sentiment scores.
- Crafted data-driven recommendations for major US retailers based on market basket analysis, pinpointing top product pairs. Achieved a targeted 10% increase in basket size and generated a sales boost of 10-15% through strategic implementation.

### Ernst & Young (Jan, 2015 - Oct, 2015)

### Analyst

Joined as part of the Tax services of EY, working for the Global Delivery Service

Efficiently handled 10+ return filings per day during peak season, minimizing errors and delays. Our expertise in tax planning and filing helped our clients stay compliant with regulations, while maximizing tax savings.

## EDUCATION

- **MSc. Applied Econometrics**  
University of Calcutta, India  
(2012-2014)
- **BSc. Economics**  
University of Calcutta, India  
(2009-2012)
